About me

As a frontend developer, I specialize in the creation, development, and maintenance of web applications using Angular and its ecosystem. I hold a University Technician degree in Programming and I am currently studying English at the Forget Me Not Institute.

Experience

Bytewave - Frontend Developer

February 2024 - Present

I am currently working as a Frontend Developer at Bytewave, where I develop and maintain applications for various clients. My experience ranges from implementing new features to creating complete applications from scratch.

Education

University Technician in Programming

March 2021 - February 2024

Universidad Tecnológica Nacional - Graduated

English

March 2022 - Present

Forget Me Not Institute - Currently B1 Level

Certificates

I hold certificates in layout design, authentication, and application development with Angular, as well as certificates in Java, Spring Framework, and Spring Boot.

Personal Contribution

In parallel, I develop and maintain my own blog, Resources, and have contributed to an open-source web application that has over 1 million visits.

Skills

I specialize in web development, with a strong focus on frontend technologies such as JavaScript, TypeScript, HTML, CSS, Angular and its ecosystem, backend technologies like Java, Spring Framework, and Spring Boot, relational databases such as MySQL and PostgreSQL, and tools like Git, GitHub, Scrum, and Jira.
